

# Sequence File HEX Format

The first 3 address on the sequencer mode has the sequential arpeggiator.

The characters on the sequence file "SequenceXXA" are addressed to the value of the controller for the Arpeggiator.

The characters are converted to the HEX numbers.

The system reads the HEX numbers then select the status of the Arpeggiator.

<u>HEX to Arpeggiator control</u>	
0xX0 ~ 0xXF	ARP_NOTE #1 ~ 16
0x0X	UP count
0x1X	UP/DOWN count
0x2X	DOWN count
0x3X	RANDOM
